

^{*} The Chief Information Officer (CIO) has responsibility for strategic direction and oversight of this agency; and, for budget purposes, that position and associated funding are also reflected here within the Department of Information Technology within the General Fund.

Mission

To deliver and support an innovative technology environment to strengthen the public service commitment of Fairfax County.

Focus

The Department of Information Technology (DIT) manages, coordinates and implements all aspects of information technology deployment supporting the delivery of County agencies' services to residents. The department also assists in the improvement of service delivery to County residents through the use of technology. Funding for DIT activities is also included in Fund 505, Technology Infrastructure Services, which includes data center operations, the enterprise data communications network, radio center services and 911 communications. Fund 104, Information Technology, supports major projects, including those with countywide strategic importance such as infrastructure; application system modernization; and enterprise-level applications such as Geographic Information Systems (GIS) and e-government initiatives.

The department strives to implement proven and dependable technology using best-practices management techniques and fully leveraging technology investments. Recognizing the fluid technology environment in which the County supports a wide variety of business function requirements along with the rapid pace of marketplace technology advancement, DIT continually seeks to find the appropriate balance between its stewardship role in leveraging the current information technology investments and its strategic role in

^{**} As mandated by federal regulation, Fairfax County has a HIPAA Compliance function, which reports directly to the CIO.

^{***} All staffing and operating support for Infrastructure Services is found in Volume II, Fund 505.

pursuing and embracing opportunities to innovate and strengthen technology use that will result in high value County services. DIT builds strategic partnerships with County agencies in fulfilling its mission. DIT uses a strategic planning process and a collaborative business and technical execution model to ultimately provide the County with a return on investment in the form of increased access to the government and improved service that facilitates the ability to meet County growth and demand for services economically. The results are improved processes for County operations, greater efficiencies and effectiveness in service delivery, improved opportunities for data sharing and decision making, enhanced capability to the public for access to information and improved use of County Information Technology (IT) assets. The work of DIT is performed by County staff in direct execution, project management and asset management roles. DIT partners with the private sector for expert skills to augment the overall capacity to develop and implement projects and support operational activities.

In implementing technology, DIT executes the County's security policy through strategies that build a secure

THINKING STRATEGICALLY

Strategic challenges for the Department include:

- Fulfilling new and increasing demands for technology services in innovative, costeffective ways;
- Ensuring the security of the County's IT investments and information assets;
- Pursuing IT investment opportunities that provide citizens with increased government access, integrated information and improved services;
- o Aligning technology solutions with the County's changing business needs; and
- o Keeping pace with rapid change in the technology field by maintaining high technical competence of IT staff.

technology infrastructure and protect the County's systems from unauthorized access, intrusions and potential loss of data assets. This activity is closely aligned with the Health Insurance Portability and Accountability Act (HIPAA) compliance program and its core group of interdepartmental representatives. The HIPAA program partners with DIT's information security program to develop and share technical strategies and solutions required to meet standards, policy and compliance around the IT aspects of HIPAA.

New Initiatives and Recent Accomplishments in Support of the Fairfax County Vision

| Maintaining Safe and Caring Communities | Recent Success | FY 2005 Initiative | Cost Center |
|--|-------------------|-----------------------|----------------|
| Supports emergency response and homeland security initiatives by implementing: | | | |
| an Emergency Alert Notification System for coordinated planning, mobilization and dissemination of information; | | | |
| a web-based incident management system to support multi-agency emergency response statuses and will be used to provide data needed to apply for FEMA reimbursements; | | ₫ | Agencywide |
| an interface between the Police and Fire and Rescue Departments records management system with the 911 Center IT system; and | | | |

| Maintaining Safe and Caring Communities | Recent Success | FY 2005 Initiative | Cost Center |
|---|-------------------|-----------------------|-------------------------|
| the initial phases of a new radio network expansion project that provides secure, reliable communications channels and improves the interoperability with other jurisdictions and state and federal response agencies. | | | |
| Enhances record management capabilities by: | | | |
| completing the second phase of the Sheriff Information Management System including booking, classification, medical and forensic applications, and initiating development on the third phase which will include the Pre-Release Center and Criminal Corrections processing; | | | |
| implementing the Assessment and Treatment Plan (ATP) module of SYNAPS for the Fairfax-Falls Church Community Services Board (CSB), allowing clinical staff to create on-line clinical assessments and treatment plans; | | ☑ | Application Services |
| implementing an enhanced system for daily call and response data in the Police and Fire and Rescue Departments, ensuring compliance with EMS reporting requirements; and | | | |
| developing a 'universal name search capability' connecting several disparate public safety databases, facilitating faster and more thorough inquiries for police records during a police incident. | | | |
| Enhanced the capability of the intake process for clients seeking County assistance through e-Assist and integrated the data with other agency applications, providing a smooth workflow between agencies. | | | Application Services |

| Building Livable Spaces | Recent Success | FY 2005 Initiative | Cost Center |
|---|-------------------|-----------------------|-------------------------|
| Enhanced Land Development process improvements through the: automation of processes related to bonds, waivers and grading plans; implementation of the multi-agency Permitting & Inspection Services and Complaints Management system, which consolidated several databases to provide citizens the ability to request permits and inspections, check the status of the request and file a complaint online 24 hours per day, 7 days per week; and enhancement of an existing system that now allows state and local government entities to enter development plan review comments directly into a County system and allows private engineering and development firms to enter their data with minimal County support. | ✓ | | Application Services |
| Connecting People and Places | Recent Success | FY 2005 Initiative | Cost Center |
| Enhanced service delivery by implementing full case management features of the Adult and Aging programs, allowing system accessibility for human services field workers in remote locations. | | | Application Services |
| Increased citizen accessibility to data by: developing an interactive voice system to easily find locations and hours of operations of any public library; providing 50 GIS data layers via the Internet, allowing citizens to create their own maps; incorporating information for the towns of Herndon and Vienna on the County's Community Resident Information Services (CRIS) kiosks; and deploying 26 ADA compliant kiosks. | ₹ | | Application Services |
| Expanded the County's Constituent Response platform into the Department of Public Works and Environmental Services (DPWES). This implementation replaced numerous action and mail logs of DPWES agencies with a departmentwide system, which enabled more collaboration and streamlined the monitoring and tracking of correspondence, events and issues. | ¥ | | Application Services |

| Connecting People and Places | Recent Success | FY 2005 Initiative | Cost Center |
|--|-------------------|-----------------------|--|
| Implement the first phase of the County Telecommunications Strategic Plan with the procurement and installation of major switch upgrades for the Government Center and Massey complex. | | ð | Technical Support and Infrastructure Services |
| Expanded GIS mapping capability by implementing Pictometry, a program providing 3-D images of land and structures to support detailed analysis in the Department of Tax Administration, DPWES and Public Safety agencies for items such as real estate appraisal and hostage situations. | | | Application Services |
| Creating a Culture of Engagement | Recent Success | FY 2005 Initiative | Cost Center |
| Accelerated the roll-out of online, interactive transactions via web-based e-government technologies and developed a wireless application that allows constituents to send e-mail or conduct County business via mobile devices. | | | Architecture Planning and Administration |
| Continue development of a master address database that will be available to all County applications and users. This database will enable the County to reduce mailing costs, keep more accurate data on locations and enable more data to be linked to the GIS. | | | Application Services |
| Corporate Stewardship | Recent Success | FY 2005 Initiative | Cost Center |
| Increase focus on IT, data security and implementation of Health Insurance Portability and Accountability Act (HIPAA) and other required data privacy standards. Design information system and data security solutions associated with new system architecture and web-based applications. Implement improved IT 'safe' architecture, network security perimeter and virus management program. | | ď | Architecture Planning and Administration |

| Corporate Stewardship | Recent Success | FY 2005 Initiative | Cost Center |
|---|-------------------|-----------------------|---|
| Improve agency efficiency and service delivery through: the replacement of an aging real estate residential and commercial tax system; the implementation of a comprehensive management and monitoring of legal issues system in the Office of the County Attorney; the migration of all County desktops to a standard IT platform, improving data sharing and distribution of documents; the automation of vehicle maintenance data; the implementation of electronic online benefits signup for County employees reducing staff time for rekeying information; and the implementation of a business workflow application in the Human Services area, increasing efficiencies in the request and approval phases of procurement. | ✓ | Ĭ | Application Services Technical Support and Infrastructure Services |
| Improved access to County government and services by: developing a web-based Tax Evaders application that allows citizens to report vehicles without decals who are not in compliance with tax requirements; developing a web-based HIPAA application to receive and evaluate complaints of HIPAA violations; and implementing an Internet-based application for non-profit providers funded by the Consolidated Community Funding Pool to electronically report invoices, expenditures and service outcomes. | ¥ | | Architecture Planning and Administration Application Services |

FY 2005 Funding Adjustments

The following funding adjustments from the FY 2004 Revised Budget Plan are necessary to support the FY 2005 program:

♦ Employee Compensation

\$763,399

An increase of \$753,548 in Personnel Services associated with salary adjustments necessary to support the County's compensation system, and an increase of \$9,851 due to recovering less in salaries for services performed for other agencies, based on projected FY 2005 activities.

♦ Other Adjustments

\$154,613

An increase of \$154,613 in Personnel Services associated with salary adjustments necessary to support two positions transferred to the agency from the Department of Administration for Human Services resulting from further refinement of the information technology reorganization that was initiated in the FY 2004 Adopted Budget Plan.

♦ Carryover Adjustment

(\$1,061,928)

A decrease of \$1,061,928 in Operating Expenses due to the FY 2003 carryover of encumbered items.

♦ Intergovernmental Charges

(\$19,582)

A decrease of \$19,582 in intergovernmental charges primarily for Information Technology infrastructure charges based on the agency's historic usage of mainframe applications.

Board of Supervisors' Adjustments

The following funding adjustments reflect all changes to the <u>FY 2005 Advertised Budget Plan</u>, as approved by the Board of Supervisors on April 26, 2004:

♦ Software Assurance (\$417.913)

A decrease of \$417,913 in Operating Expenses, eliminating the County's participation in a multi-year software replacement program designed to distribute the cost for software upgrades annually, rather than as a one-time expenditure.

♦ Position Reduction (\$95,776)

A decrease of \$95,776 in Personnel Services, associated with the abolishment of 1/1.0 SYE Management Analyst IV position, supporting applications for the County Attorney, County Executive, Board of Supervisors, Facilities Management Division, Libraries, and other smaller agencies. Eliminating this position will require that workload be absorbed by other branches.

♦ Consultant and Research Services

(\$94,181)

A decrease of \$94,181 including \$50,000 for web application support and \$44,181 for research services. The reduction in web application support will result in delays in adding online transactions on the County's Web site and in addressing system maintenance issues. The reduction in funding for research services impacts the agency's ability to stay current on technology issues and innovations.

♦ Hardware Parts (\$50,000)

A decrease of \$50,000 for spare computer parts, leading to delays in repairing 3,000 desktops serving Human Service agencies, which typically require a higher level of configuration due to state and federal interface requirements.

Changes to FY 2004 Adopted Budget Plan

The following funding adjustments reflect all approved changes in the FY 2004 Revised Budget Plan since passage of the FY 2004 Adopted Budget Plan. Included are all adjustments made as part of the FY 2003 Carryover Review and all other approved changes through December 31, 2003:

♦ Encumbered Carryover Adjustment

\$1,061,928

As part of the FY 2003 Carryover Review, \$1,061,928 in encumbered carryover was added.

Other Adjustments

\$0

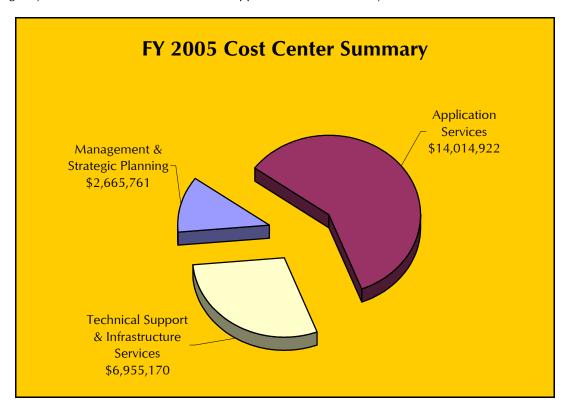

An increase of 2/2.0 SYE positions redirected from the Department of Administration for Human Services resulting from further refinement of the information technology reorganization that was initiated in the FY 2004 Adopted Budget Plan.

The following funding adjustments reflect all approved changes to the FY 2004 Revised Budget Plan from January 1, 2004 through April 19, 2004. Included are all adjustments made as part of the FY 2004 Third Quarter Review:

The Board of Supervisors made no adjustments to this agency.

Cost Centers

The General Fund supports the Architecture Planning and Administration, Application Services, and Technical Support and Infrastructure Services cost centers. The Architecture Planning and Administration cost center assists County agencies and other DIT cost centers in the planning and execution of information technology strategies. The activities include development policies and procedures, technology architecture and standards, IT security and information protection services, strategic planning, IT investment portfolio and project management, and administrative support. The Application Services cost center provides for the design, implementation and maintenance of information systems for all County business areas, e-government and GIS. The Technical Support and Infrastructure Services cost center functions include management of the County's LAN environments, server platforms, database administration and telephone systems. It also includes the Technical Support Center ('help desk'). This cost center also provides operational and contingency services for telecommunication support to the Public Safety Communications Center.

Key Performance Measures

Goal

To provide technology management and fiscal and administrative services to County agencies in order to ensure that appropriate and cost-effective use of IT services are provided to residents of Fairfax County.

Objectives

♦ To maintain the fiscal management and administrative operation support for the department and divisions at a 90 percent satisfaction rating from the DIT managers.

| | | Prior Year Actu | Current Estimate | Future Estimate | |
|--|-------------------|-------------------|----------------------------|--------------------|---------|
| Indicator | FY 2001 Actual | FY 2002 Actual | FY 2003 Estimate/Actual | FY 2004 | FY 2005 |
| Output: | | | | | |
| Procurement transactions processed | 2,180 | 2,051 | 2,268 / 2,272 | 2,300 | 2,300 |
| Efficiency: | | | | | |
| Staff hours to process a procurement transaction | 1.86 | 2.20 | 2.50 / 2.47 | 2.50 | 2.50 |
| Service Quality: | | | | | |
| Percent of procurement transactions processed correctly the first time | 94% | 95% | 94% / 95% | 94% | 94% |
| Outcome: | | | | | |
| Percent of DIT management personnel satisfied with tasks performed | 91% | 92% | 90% / 91% | 90% | 90% |

Performance Measurement Results

The greatest forces on DIT's performance for the last several years have been the implementation of enterprise IT architecture and standards, accelerated use of e-mail as an enterprise business application and the implementation of Internet-based applications for transacting County business, all of which have resulted in the increase in procurement transactions. During this time, the agency also has reduced its staffing and expenditure levels to respond to a reduced funding level. While the combination of these factors has resulted in a longer time to process transactions, a consistently high rate of accuracy and satisfaction with the work achieved has been maintained.

Key Performance Measures

Goal

To provide technical expertise in the implementation and support of computer applications to County agencies in order to accomplish management improvements and business process efficiencies, and to serve the citizens, businesses and employees of Fairfax County.

Objectives

- ♦ To increase the availability and use of GIS data and services from 7.07 percent to 7.78 percent of total constituency with an eventual level of 25 percent.
- ♦ To maintain the number of transactions available to citizens and businesses offered after business hours at 25 percent.
- ♦ To ensure that agency supervisors are at least 99 percent satisfied with their employees' post-training knowledge and skills in using desktop information.

- ♦ To ensure the agency supervisors are at least 95 percent satisfied with their employees' post-training knowledge and skills in using corporate business information systems.
- ♦ To maintain IT application projects that have complete documentation in accordance with County standards at 60 percent.

| Percent of IT application projects that have complete documentation in accordance with County standards | 22% | 49% | 60% / 50% | 60% | 60% |

⁽¹⁾ This includes counter sales, internal work requests, zoning cases, right-of-way projects, DTA abstracts, GIS server connections, Spatial Database Engine, GIS related HelpQ calls, and GIS projects.

^{(2) &}quot;Constituency" is taken from the Federal Census 2000 counts for Fairfax City, Fairfax County, and the City of Falls Church.

Performance Measurement Results

The agency has seen a large increase in the number of GIS users, reflecting the technical capabilities of the constituency and the constituency's interest in the information provided to them via the County website. In addition, the agency has increased its efforts to ensure interactions with the County are available 24/7. Although many users enter the County website after hours, many still make their transactions during regular business hours. Despite drops in the number of staff trained due to agency budget reductions since FY 2003, training efforts have resulted in a skilled workforce with a high degree of satisfaction in their ability to perform technical duties. There will be an increased emphasis on the documentation of IT applications in FY 2005.

Key Performance Measures

Goal

To provide the underlying technology required to assist County agencies in providing effective support to citizens.

Objectives

- To maintain the number of business days to fulfill telecommunications service requests for: a) non-critical requests at a standard of 4 days; b) critical requests from at a standard of next business day; and c) emergency requests the same day.
- To improve the percentage of LAN/PC workstation calls to Technical Support Services closed within 72 hours by three percentage points, from 85 percent to 88 percent.
- To improve the resolution rate for the average first-call problem for the Technical Support Center (TSC), DIT Help Desk by three percentage points from 85 percent to 88 percent.

| | Prior Year Actuals | | Current Estimate | Future Estimate | |
|---|--------------------|-------------------|----------------------------|--------------------|---------|
| Indicator | FY 2001 Actual | FY 2002 Actual | FY 2003 Estimate/Actual | FY 2004 | FY 2005 |
| Output: | | | | | |
| Responses to call for repairs on voice devices | 5,335 | 5,356 | 6,785 / 4,204 | 4,750 | 4,900 |
| Help desk calls with data questions | 2,265 | 3,136 | 1,625 / 2,682 | 2,375 | 2,400 |
| Moves, adds, or changes for voice and data | 8,265 | 8,435 | 7,650 / 2,271 | 2,400 | 2,466 |
| Calls resolved | 1 <i>7,</i> 503 | 21,769 | 19,500 / 18,223 | 25,000 | 26,250 |
| Customer requests for service fulfilled by Technical Support Center (TSC) (1) | 38,869 | 54,259 | 45,000 / 54,058 | 76,000 | 79,800 |
| Efficiency: | | | | | |
| Cost per call | \$120 | \$125 | \$110 / \$110 | \$105 | \$105 |
| Hours per staff member to resolve calls | 1,407 | 1,407 | 1,407 / 844 | 992 | 1,042 |
| Customer requests for service per TSC staff member | 3,886 | 4,933 | 4,091 / 4,505 | 6,333 | 6,650 |
| Service Quality: | | | | | |
| Customer satisfaction with telecommunication services | 84.0% | 88.0% | 95.0% / 95.0% | 95.0% | 95.0% |
| Percent of customers reporting satisfaction with resolution of LAN/PC workstation calls (2) | 91% | 80% | 75% / 77% | 80% | 80% |
| Percent satisfaction of County employees with support from the TSC | 84% | 88% | 90% / 86% | 88% | 89% |
| Outcome: | | | , | | |
| Business days to fulfill service requests from initial call to completion of request for: Non-critical requests | 14 | 4 | 4/3 | 4 | 4 |
| Business days to fulfill service requests from initial call to completion of request for: Critical requests | 6 | 2 | 2/2 | 2 | 2 |
| Business days to fulfill service requests from initial call to completion of request for: Emergency requests | 3 | 3 | 1/2 | 1 | 1 |
| Percent of calls closed within 72 hours | 57% | 68% | 70% / 80% | 85% | 88% |
| Percent of first-contact problem resolution | 60% | 89% | 91% / 77% | 85% | 88% |

⁽¹⁾ The FY 2004 merger of the Human Services IT help desk with DIT is expected to drive the increase in customer requests for TSC service.

⁽²⁾ A decrease in customer satisfaction with the resolution of LAN/PC workstation calls in FY 2003 was due to a scheduled Architecture Refresh program which resulted in increased support requirements.

Performance Measurement Results

This cost center provides critical infrastructure services, including integrated communication service to all County agencies and other government customers; response to service requested through the help desk; and maintenance of the County data communication networks. The performance measures for this cost center focus on delivering and securing a stable IT environment.

Overall, DIT met or substantially met the majority of its performance objectives in FY 2003. Many factors contributed to this performance, including more calls seeking assistance with complex technology and new agency-specific applications that the Technical Support Center had not been trained to help with; increased use of remote access for telework, older generation PCs on the network; and too many customized desk-top configurations in agencies. Also impacting performance measures was a change in the methodology for counting telecommunications service requests in FY 2003 so that calls requiring multiple actions are reported as one request versus a separate request for each action taken. Since July 2003, the support provided by DIT and Human Services Information Technology help desks has been combined, which will generate additional total calls to the help desk.
